FOREWORD

Welcome to I2TS 2007, the 6th International Information and Telecommunication Technologies Symposium and welcome to the Catholic University of Brasilia – UCB jointly University of Brasilia – UnB, which are providing this event.

I2TS 2007 aims at bringing together engineers, professors and students to share and exchange their experiences, discuss challenges and report the state-of-art in information and telecommunication systems.

JEMS has eased our task for dealing with the aspects for the TPC work. In this year we had 76 papers submitted – english and portuguese papers - through the JEMS (Brazilian EDAS system). Of these, 18 english papers – 15 full papers and 3 short papers - were accepted and are published for english track. This represents 19.7% for full english full papers. By considering all papers submitted (portuguese and english) we had 35 papers accepted (where 28 portuguese and english full) works to be published.

We would like to express our gratitude to everyone who contributed towards the success of this syposium, such as IEEE-R9, UCB, CTC-UFSC, ITI, Bank of Brazil, Itaipu Binacional, UnB and all researchers and reviewers which provide us support to realize this event.

Finally, but not least we would like to thank all the participants. We sincerely hope you enjoy to the symposium and to the beautiful of Brasilia city, the capital city of Brazil.

Full and Short Papers

Mobile and Wireless Networks I

- An IP-video Surveillance Indoor System Using Mesh Networks.** Pablo Corral, *Universidad Miguel Hernandez, Spain*1-8
- Performance Analysis of Total Cost on HMIP Parameters.** Sapna Gambhir, *M.D.University, Rohtak, India*9-14
- An Architectural Self-Organization Model for Large-Scale Wireless Mesh Networks Based in Technology of Agents.** Lucas Guardalben, João Bosco M. Sobral, *Federal University of Santa Catarina, Brazil.* 15-18
- Online Charging to Sustain Sensor Networks.** Philippe Moore, *Tenable Network Security, USA* Anil Shende, *Roanoke College, USA.* 19-21

Mobile and Wireless Networks II

- Distance Estimation System based on ZigBee.** Pablo Corral, *Universidad Miguel Hernandez, Spain.* 22-28
- Performance analysis of the association of the routing protocols AODV and DSR with the Gossip algorithm and the Quorum system.** Renata Rosa, Jose Roberto A. Amazonas, *Universidade de São Paulo, Brazil.*29-35
- Intelligent Medium Access for MANETs with Principle of Circularity.** Prasanna Shivanna Jayalakshmi, *Hughes Systique Corporation, India,* Anjini Shukla, *University of California, Santa Barbara, USA.*36-41
- Energy-Balanced Cooperative Routing Approach for Radio Standard Spanning Mobile Ad Hoc Networks.** Matthias Vodel, Mirko Caspar, Wolfram Hardt, *Chemnitz University of Technology, Germany.* 42-47

Applications

- Ludos Top: A Web-Based 3D Educational Game Multi-User Online.** Everton Souza, Edgard Lamounier, Alexandre Cardoso, Luciano Silva, Marlene Freitas, *Federal University of Uberlandia, Brazil, UFU, Brazil.*48-55
- Hybrid OpenMP/MPI Parallel Programming of a Finite Elements Method Application.** Leonardo Silva, Flávia Villa Verde, Gerson Pfitscher, *University of Brasília, Brazil.* 56-61
- A Method to Estimate Physical and Cognitive Effort in Chording Data-Entry Systems.** Antonio Marcon, *BenQ-Siemens Mobile, Brazil*
